4. First-aid measures

**Inhalation**: Remove to fresh air. If the victim has difficulty breathing or tightness of the chest, give 100% oxygen with rescue breathing or CPR as required and transport to the nearest medical facility.

**Skin Contact**: Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available.

**Eye Contact**: Immediately flush eyes with large amounts of water for at least 10 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment.

**Ingestion**: Immediately make victim drink plenty of water. Do not induce vomiting; Do not eat milk and castor oil, transport to nearest medical facility for additional treatment.

5. Fire-fighting measures

**Suitable extinguishing media**: Water spray or fog, Dry chemical powder, Alcohol-resistant foam and Carbon dioxide.

**Specific hazard arising from the chemical**: May produce toxic fumes of carbon monoxide, carbon dioxide if burning.

**Special protective action for fire-fighters**: Keep adjacent containers cool by spraying with water.

**Protective Equipment**: Wear full protective clothing and self-contained breathing apparatus.

6. Accidental Release Measures

**Protective Measures**:
- Observe all relevant local and international regulations.
- Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For guidance on selection of personal protective equipment see chapter 8 this Material Safety Data Sheet. Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area.
Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

- Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

### Clean-Up Methods

<table>
<thead>
<tr>
<th>Type</th>
<th>Method</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Small spillage</strong></td>
<td>Transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.</td>
</tr>
<tr>
<td><strong>Large spillage</strong></td>
<td>Transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.</td>
</tr>
</tbody>
</table>

### Other Information

- Notify authorities if any exposure to the general public or the environment occurs or is likely to occur. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back.

### 7. Handling And Storage

<table>
<thead>
<tr>
<th>Handling</th>
<th>Avoid contact with skin, eyes, and clothing. Do not breathe vapours. Extinguish any naked flame. Remove ignition sources. Avoid sparks. Do not smoke. The vapour is heavier than air spreads along the ground and distant ignition is possible. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Do not use compressed air for filling, discharging, or handling operations. Handle and open container with care in well-ventilated area. Do not empty into drains.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storage</td>
<td>Must be stored in a diked (bunded) well-ventilated area, away from sunlight, ignition sources and other sources of heat. Bulk storage tanks should be diked (bunded). Keep away from aerosols, flammables, oxidizing agents, corrosives. Storage Temperature: Ambient.</td>
</tr>
<tr>
<td>Product Transfer</td>
<td>Keep containers closed when not in use. Do not use compressed air for filling, discharging, or handling operations. If positive displacement pumps are used, these must be fitted with a non-integral pressure relief valve. Ensure electrical continuity by bonding and grounding (earthing) all equipment.</td>
</tr>
<tr>
<td>Recommended Materials</td>
<td>For containers, or container linings use mild steel, stainless steel.</td>
</tr>
</tbody>
</table>
Additional Advice: Containers even those that have been emptied, can contain explosive vapours. Do not cut, drill, grind, weld or perform similar operations on or near containers.

8. Exposure Controls and Personal Protection

Exposure Standard: Occupational Exposure Limits
- TLV-TWA = 400 ppm (980 mg/m³)
- TLV-STEL = 500 ppm (1230 mg/m³)

Engineering Controls Workplace: Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective threshold limit value.

Respiratory Protection: Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate.

Hand Protection: Butyl rubber gloves, Nature rubber gloves, Neoprene rubber gloves, Nitrile rubber gloves.

Eye Protection: Chemical splash goggles (chemical monogoggles).

13. Disposal Considerations

Material Disposal: Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classifications and disposal methods in compliance with applicable regulations.

Container Disposal: Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Refer to Section 7 before handling the product or containers. Residues may cause an explosion hazard. Do not puncture, cut or weld uncleaned drums. Send to drum recoverer or metal reclaimer.

Local Legislation: Disposal should be in accordance with applicable regional, national, and local laws and regulations. Local regulations may be more stringent than regional or national requirements and must be complied with.
